PROFESSIONAL SUMMARY

Information Technology student with a strong interest in software development, Artificial Intelligence, and Information Security. Experienced in developing programming and embedded-system projects using C/C++, Arduino, Git, and GitHub. Interested in building practical technology solutions, learning Python, and continuously improving problem-solving and software development skills.

PROFESSIONAL EXPERIENCE

Smart Dorm Energy Monitoring System

(Personal Project)

Developed a system for monitoring and managing energy consumption in dormitory environments.

Designed and implemented the project using programming and web technologies.

Worked with Git and GitHub for source-code management and project development.

Focused on creating a practical solution for monitoring electricity usage and improving energy efficiency.

Arduino Dancing Robot

(Personal Project)

Designed and programmed an interactive robot using Arduino Uno and multiple servo motors.

Implemented movement control for the head, arms, wings, chest LED, and sound sensor.

Applied an object-oriented programming approach to organize the robot control system.

Optimized the program to reduce servo jitter and improve the robot's movement stability.

Used C/C++ for embedded programming and Git/GitHub for project management.

Personal Portfolio Website

(Personal Project)

Developed a personal portfolio website to showcase programming projects, skills, and academic experience.

Designed a responsive and modern interface using HTML, CSS, and JavaScript.

Integrated project information and personal profile sections for job applications.

Deployed projects using GitHub and GitHub Pages.

TECHNICAL SKILLS

Programming:

C, C++, Python (Learning)

Web Development:

HTML, CSS, JavaScript

Tools:

Git, GitHub, VS Code, Canva

Embedded Systems:

Arduino, Servo Motors, Sensors

EDUCATION

BACHELOR OF INFORMATION TECHNOLOGY

University of Industry and Trade, Ho Chi Minh City

Faculty of Information Technology

Currently studying
